Pro Series Ignition Wire Sets

BWD's ready to install custom fit Pro Series 8mm Triple Silicone wire sets can be used with stock coils or when upgrading to a performance coil. These spark plug wire sets meet or exceed all factory requirements. Our special triple silicone wire features a quality construction of silicone throughout the jacket, insulation and core. This assures high temperature resistance and high durability. Our wire sets also offer maximum RFI suppression, high dielectric strength silicone boots, OEM style terminals that lock onto the spark plug and much more. Coverage available through current models to Dyna®, Softail®, and Touring® models. Ask for them by name!

>> Ignition Coils & Starter Relays >>

BWD® Ignition Products, long considered "The Standard" for ignition products, has designed a "Super Fast" Ignition Coil that features a quick rise time for easier starts. This coil is a stand alone product that will enhance the performance of the motorcycle's ignition system. The coil also has the following benefits:

- High RPM range for use with street and race applications
- More spark energy than the OEM coil under full load
- 45,000+ volts for maximum performance
- Higher voltage eliminates spark deterioration even at high RPM
- Fully encapsulated for long life, will withstand extreme conditions
- Vibration resistant to withstand the punishing environment of the race track
- Rapid heat dissipation for long life under severe conditions
- Smaller and lighter than stock but fits into stock mounting bracket
- Compatible with stock and aftermarket ignitions

Part No.	Application
MC1201*	Single Fire Ignition Coil with 3 Ohm primary for use with most after market single fire ignitions.
* Not legal for use on pollution controlled vehicles

MC1205 - Starter Relay: our BWD® "over spec" Starter Relay is designed for superior performance and durability. They feature a high temperature polyester insulated copper wire to protect against overloads. A glass/mineral filled thermosetting polyester case that is tougher and therefore more impact resistant than OE. A corrosion resistant copper plated bracket that provides for reliable grounding and contacts that won't rotate out of position when tightened. This unit is designed for long-life – peak performance.

>> Points & Condensers >>

BWD® Ignition Performance Points are built from only the highest quality materials. Each point set features an extra heavy duty construction that includes the exclusive LubriWick® for continuous lubricant application, which virtually eliminates wear on the rubbing block. These parts also feature ventilated contacts, copper shunts for point bounce elimination and a positive screw type terminal. Our one piece nylon breaker arm body provides longer tune-up life. These features ensure that BWD® Points provide the longest life of any contact set on the market today. Our BWD® Condensers feature a high capacitance mylar/foil construction that helps eliminate internal shorting and each condenser is sealed to prevent breakdown due to condensation or moisture. Our lead wires are spot welded to an internal tab to prevent connections from coming loose or pulling out. Again, assuring only the best in the market today!
