

WELCOME GARDENERS

Inside this edition is a selection of our most popular vegetable, flower and herb varieties along with all sorts of excellent garden accessories to aid in your growing success. We invite you to flip through this Gardening Guide to plan for next season and remember we have more seed varieties and larger package sizes on our website at www.StokeSeeds.com.

This year's feature pages touch on growing vegetables, flowers and herbs within a small footprint. We are suggesting many variety solutions adaptable to your gardening space. Whether you live in an urban setting and are limited to a sunny condo window or small balcony or have a small rural yard we are suggesting variety solutions for a few applications. As always we love to share customer favourites and easy to grow varieties for gardening beginners.

Enjoy browsing and have a great summer gardening!

5th Generation Owner

~ OUR PROMISE TO YOU ~

All seed is tested for germination and vigor each year, before we sell it. We maintain our own seed testing department to ensure that only seeds of high germination will be supplied to our customers. If you are unhappy with your purchase from Stokes Seeds for any reason, give us a chance to make it right. Call us at 1-800-396-9238 and ask for our Customer Service department.

CATALOGUE SYMBOL KEY

Vegetable & Flower of Merit

Merit badges represent varieties that are selected for their outstanding quality and dependable performance during trials held by Stokes in the Northeast U.S., Midwest U.S., and Canada.

New This Year

Untreated Seed

Some people prefer Untreated Seed for their needs. We have a selection of untreated varieties available.

Staff Pick

Many of "The Folks at Stokes" are home gardeners and we have noted their favoured varieties.

Customer Favorite

Our Customer Service values and compiles customer testimonials and shares results from our survey, which we are now sharing with you.

HOT NEW PRODUCTS FOR 2021

CLEMENTINE (CAULIFLOWER)

70-75 days. With an eyecatching and distinct deep orange curd color this unique variety boasts a strong, healthy and vigorous plant. An ideal variety for most temperate growing locations.

Item# 97M Packet (25 seeds) \$7.75 1,000 seeds \$191.36

SHOCK WAVE™ PURPLE TIE DYE (PETUNIA)

Spreading petunia. Masses of small 1.5 in/4 cm purple and white flowers, on lush plants that reach a garden height of 7-10 in/17-25 cm, spreading 3 ft/90 cm.

item# P1212M 20 pellets

100 pellets

\$12.05 \$38.40

LUMINUS (BRUSSELS SPROUTS)

120 days. Produces nicely shaped, large, uniform buttons on an upright plant. An early-maturing variety known for it's classic taste.

Item# 44M
Packet (50 seeds) \$5.50
1,000 seeds \$48.57

NONSTOP SUNSET NEW!

This series produces 100% double flowers, 3.5 in/9 cm across on 12 in/31 cm plants. Use for sales of 4 in/10 cm pots in late summer or spring as a bedding plant.

Item# P719V Pkt. (50 pellets) 250 pellets

\$5.95 \$21.90

COURIER (MELON)

85 days. Excellent yield, eating quality, superior taste and sugar content with few culls. Strong vines produce uniform, slight oval fruit. Exterior is golden tan and well netted.

Item# 194E
Packet (25 seeds) \$6.75
250 seeds \$35.05

SRIRACHA™ ROSE (CUPHEA)

(14-18 in/35.5-45.5 cm) Compact, well-branched plants produce rose colored blooms. Sun loving and suitable for containers, this plant also attracts pollinators.

Item# 913F Pkt. (25 seeds) \$9.95 250 seeds \$91.35

KOZY COATS®

Frost protection for an earlier growing season. Give your vegetables and garden blooms a jump start by guarding them against the outdoor elements as early as March.

Whether it's tomatoes, cucumbers, peppers or melons, Kozy Coats® are the secret to enjoying your heat loving plants early every year. Reusable water filled tee-pees store heat during the day and protect your plants at night.

New red color enhances photosynthesis for stockier plants; new plastic lip at top allows for quicker, easier filling with water.

Three gallons (12 litres) of water in the tubes stores heat and even acts as an igloo when temperatures plunge 12 degrees below freezing!

Item# MT310

10 pack

\$34.95 ea.

BALCONY GARDENING

Having a sufficiently sized, well-draining container, dirt, water and sun, you can grow some tasty selections and beautiful flower planters.

PATIO BABY (EGGPLANT)

16 in/41 cm. Dwarf upright bushy plant produces high yields of 3 in/7.5 cm tear-drop shaped black smooth skin fruit very early in the season.

Item# 159N Packet (25 seeds)

\$3.50 \$14.45

250 seeds \$14.45

Basil Pesto

Credit: cookieandkate.com

Recipe yields 1 cup pesto.

Ingredients:

- 1/3 cup raw pine nuts, almonds, walnuts or pecans
- · 2 cups packed fresh basil leaves
- 1/4 cup grated Parmesan cheese
- 1 tbsp. lemon juice
- 2 cloves garlic, roughly chopped
- 1/2 tsp. fine sea salt
- 1/2 cup extra-virgin olive oil

Toast the nuts or seeds for extra flavor over medium heat, stirring frequently, 3 to 5 minutes. Cool.

Combine the basil, cooled nuts/seeds, Parmesan, lemon juice, garlic and salt in a food processor or blender. With the machine running, slowly drizzle in the olive oil. Enjoy!

Store leftover pesto in the refrigerator, covered, for up to 1 week. Freezes well.

What is an herb?

/'h3:bz/

Any plant with leaves, seeds, or flowers used for flavoring, food, medicine, or perfume. In the case of medicinal use, any parts of the plant might be considered as "herbs", including leaves, roots, flowers, seeds, root bark and inner bark.

VERSATILE

All of our packets have detailed growing instructions, or please visit our website: www.StokeSeeds.com.

PLEASE READ THIS LIVE PRODUCT WARRANTY BEFORE ORDERING OUR SEED

NOTE: Seed is a live product which depends on many important related grower skills such as proper planting time, seed depth, type of soil, irrigation, proper use of fertilizers, weed controls, fungicides, insecticides, disease free soil, and reasonable weather conditions during the growing period. These factors are totally out of the seedsman's control and are the growers responsibility and risk. Our seed cannot be unconditionally guaranteed to perform properly - regardless of weather conditions or the growers methods or mistakes.

NOTICE TO BUYER - STOKES WARRANTY AND CONDITIONS OF SALE

Stokes Seeds Ltd., and/or Stokes Seeds Inc., and/or Semences Stokes Ltée., and fire suppliers, (herein after collectively referred to as the vendor "Stokes") warrants that the seed it sells conforms to the label description as required by Provincial and/or State and Federal Seed Laws. Stokes limits its warranty to the full amount of the purchase price of such seeds. STOKES MAKES NO OTHER WARRANTIES, GUARANTEES OR CONDITIONS EXPRESS OR IMPLIED OF THE MERCHANTABILITY, FITNESS FOR PARTICULAR PURPOSE OR OTHERWISE OF THE SEED SOLD BY IT OR THE CROPS GROWN FROM SUCH SEEDS. It is recognized that a mistake or human error can be made in the production, processing or packaging of such seed, therefore, in any event, direct or consequential on account of any negligence whatsoever - IF A BREACH OF WARRANTY, CONDITION OR CONTRACT OCCURS WITH RESPECT TO SUCH SEEDS - THAT IN NO CASE SHALL STOKES BE LIABLE FOR MORE THAN THE PRICE ACTUALLY INVOICED AND/OR PAID FOR SUCH SEEDS BY THE PURCHASEER TO THE VENDOR AND/OR THE VENDOR AND/OR THE VENDOR AND/OR THE VENDOR AND/OR SEED SHALL STOKES BE LIABLE FOR MORE THAN THE PRICE MIST OF THE VENDOR AND/OR THE

IF THIS LIMITED WARRANTY AND GUARANTEE IS NOT ACCEPTABLE TO THE PURCHASER AS A CONDITION OF SALE - THEN THE PURCHASER MUST NOT PLANT THE SEEDS AND MUST RETURN THE SEEDS IN THEIR ORIGINAL UNOPENED PACKAGE, and the purchase funds shall be refunded.

NOTICE: ARBITRATION / CONCILIATION / MEDIATION REQUIRED BY SEVERAL STATES

Under the seed laws of several states, arbitration, mediation or conciliation is required as a prerequisite to maintaining a legal action based upon the failure of seed to which this notice is attached to produce as represented. The consumer shall file a complaint (sworn for AL, AR, CO, FL, IN, MN, MS, SC, TX, WA; signed only CA, GA, ID, MT, ND, NV, RI, SD) along with the required filing fee (where applicable) with the Commissioner/Director/Secretary of Agriculture, Seed Commissioner, or Chief Agricultural Officer within such time as to permit inspection of the crops, plants or trees by the designated agency and the seedsman from whom the seed was purchased. A copy of the complaint shall be sent to the seller by certified or registered mail or as otherwise provided by state statute.

POLE, SOY & FAVA BEANS

Pole Beans: One of the nice things about pole beans is that you can grow a lot of beans in very little space. They will only grow vertically up poles or trellises. They seem to grow faster up vertical strings than poles. Two ounces of seed planted in 50 ft/15 m of 36 in/91 cm spaced hills will produce about 25 lbs/11 kg of beans. For additional cultural information and variety details, please visit our website: www.StokeSeeds.com.

SCARLET RUNNER

65 days. Brilliant scarlet flowers on 10-12 ft/3-3.5 m vines to cover arbors and fences. 6 in/15 cm tender green beans are excellent when cooked. Black seed.

KENTUCKY WONDER WAX

61 days. Old Homestead. An old favorite. The butter-yellow pods are 8 in/20 cm long, oval, meaty and tender. Harvest till frost. Brown seed.

BLUE LAKE

55 days. A straight, stringless, bean. Famous for its freezing and canning qualities. Pods are round, tender and meaty, 6-7 in/15-18 cm in length, on vigorous, heavy yielding plants.

SEYCHELLES

55 days. Dark green 5-6 in/ 13-15 cm, uniform, straight stringless pods with excellent flavor. High yields. Can grow up to 6 ft/1.8 m and should be staked. AAS Winner.

ASPARAGUS

Asparagus is a perennial vegetable. Select a well drained site where it will not interfere with annual crops. Plants should not be harvested until the second year. A 50 ft/15 m row containing 35 plants should yield about 20-25 lbs/10-12 kg of spears by the third year. Sow as early as possible.

BROAD/FAVA BEAN

1 lb/454 g will plant approximately 75 ft/23 m of row. Extra large lima-like beans love cold soil and must be planted early in the spring - late April or May, so that plants will mature in early summer when the days and nights are still cool. 2 oz/56 g contains approx 35-40 seeds.

SOY BUSH BEAN

Sow about the same time as you would lima beans (June 1st-15th) depending on your latitude. Harvest green pods like limas for cooking. Roast dried beans like peanuts. Average protein value is twice that of lima beans with less cholesterol. Plant fresh seed each spring for best germination.

MILLENNIUM

Millennium spears are very uniform and have a very high "Rutin" content, which is believed to have anti-inflammatory properties.

Item# 1A Packet (10 seeds) 250 seeds

BROAD WINDSOR LONG POD

65 days. Fava beans are one of the oldest known cultivated plants. Broad, 8 in/20 cm light green pods have 6-7 large, greenish white seeds.

Item# 30 2 oz/56 g **BESWEET 2001**

94 days. Plants average 24 in/61 cm and produce extra large greenish yellow beans. One of the best flavored edible soy beans.

Item# 11C Packet (25 seeds) 2 oz/56 g

\$3.10 \$5.50

\$3.70

LIMA, GREEN & WAX

2 oz/57 g sows 18 ft/6 m of row. Sow every 10 days - from May 20th (use treated seed for early sowings) providing the soil temperature is 60°F/16°C until July 30th. Untreated seed should not be planted until ground temperature reaches an average daytime temperature of 65°F/18°C. Seed must not touch concentrated fertilizer.

BUSH BLUE LAKE 274

55 days. These dwarf bushy plants produce heavy yields of dark green round pods averaging 6 in/15 cm in length. Tender and crisp with a unique flavor. Low fiber. Resistant to bean common Great for canning. Resistant mosaic virus. White seed.

Item# 9B 2 oz/56 g 1/2 lb/227 g

GREENCROP

55 days. Clusters of 8 in/ 20 cm flat podded snap beans are very tender and have an excellent flavor. High yielding variety. Resistant to bean common mosaic virus.

Untreated, order UT23.

Pole vs. **Bush Beans**

While similar in many ways, there are a few differences between pole and bush beans. The main being, pole beans will grow upward and require a pole or trellis for support. Bush beans do not, but take up more room in your garden to produce a similar yield.

Pole beans will continue to produce more beans as you pick them, but with bush beans they will produce most of their fruit at once and then be finished for the year.

FORDHOOK BUSH 242

70 days. Standard bush lima. Tolerant to heat, pods 3 1/2 -4 in./10 cm long, well filled, and uniform, with 3 or 4 thick beans per pod. Excellent flavor. White seed. Untreated seed.

Ideas **From Our Experts**

Go ahead: gamble. Early beans are worth the risk. It's true that beans hate frost. But a "cheater" row of beans planted a couple of weeks before the last spring frost date is worth the risk. If they aren't nipped by frost, you've moved ahead your bean harvest. If they do get hit by frost, you've lost nothing more than a few seeds and can replant.

- Steven Biggs

BEANS BUSH

All of our packets have detailed growing instructions, or please visit our website: www.StokeSeeds.com.

55 days. Dark green 5.25 in/ 13.5 cm 3 sieve very straight and slim pods. High yielding erect plants provide excellent machine harvest ability.

GOLD MINE

53 days. Wax Bean Bush. Medium sized plant with 5 in/ 13 cm smooth, straight pods. High yields, 4-5 seeds per bean. Resistant to bean common mosaic virus. White seed.

Untreated, order UT10A.

Item# UT20E 250 seeds 1.000 seeds

Item# 10A \$9.35 250 seeds \$19.28 1,000 seeds

ROCDOR

50-53 days. High class, extra-long 6.75 in/17 cm straight, deep yellow coloured wax bean. Harvest young for best quality. Germinates well in cool soil. Resistant to bean common mosaic virus. Black seed.

Untreated, order UT7.

BRIGHTEN UP YOUR

Since pests and diseases are not major concerns, **beets** are relatively easy to grow, and can be cropped in succession every 2 weeks. Frost will not harm the seed or young plants but mid-summer hot months cause them to be stringy. Although average soil will grow excellent beets, the best crops thrive in slightly acidic (pH 6.5) rich sandy loam.

Roasting Beets

Credit: spendwithpennies.com

Ingredients:

- · 6 fresh beets
- · 1 tablespoon olive oil
- salt and pepper to taste

Instructions:

Preheat oven to 375°F. Wash and cut off beet top and bottom. Cut in half and toss with olive oil, salt and pepper. Wrap in tinfoil, topped with a piece of parchment paper and seal beets. Roast for 1 ½ hours or till tender. Using paper towels, rub the beets to remove the skins. Serve warm with butter or chilled in salads.

CARILLON RZ

Broccoli Caesar Salad

Ingredients:

- 2 oil-packed anchovy fillets (optional)
- · 1 garlic clove, thinly sliced
- 1/4 cup fresh lemon juice
- 2 tsp. Dijon mustard
- Kosher salt
- 1 large egg yolk or 2 Tbsp. mayo
- 1/2 cup extra-virgin olive oil
- · 3 Tbsp. grated Parmesan
- · 2 medium heads of broccoli (1 1/2 lb.)
- 2 cups of savoy or Napa cabbage
- · Finely grated lemon zest
- · Freshly cracked black pepper

Preparation:

- 1. Mash anchovies and garlic until a smooth paste forms. Transfer to a large bowl and whisk in lemon juice, mustard, and a big pinch of salt. Add egg yolk (or mayonnaise) and whisk until smooth. Gradually add oil, whisking constantly until emulsified. Whisk in 3 Tbsp. grated Parmesan.
- 2. Cut broccoli into bite-sized pieces and thinly slice cabbage crosswise, then toss broccoli and cabbage with the dressing to evenly coat; season with salt. Let sit 10 minutes.
- 3. Top salad with shaved Parmesan, some lemon zest, and a few healthy grinds of pepper.

BROCCOLI

5,000 plants per oz/28 g; Broccoli matures quickly, therefore early (sow indoors March – April) and late crops (sow outdoors in May) are possible. Sow seed indoors in flats from March to early April. Set plants outdoors in late April or early May. Broccoli needs water once a week, but will die if roots are flooded for 24 hours.

EASTERN MAGIC

103 days. This multi-use broccoli is high-domed, has an exceptional blue-green colour and good heat tolerance. Performs well under long days and moderate heat.

GYPSY

97 days. Smooth 6 in/15 cm dome heads with good holding ability in warm weather. Medium size beads on uniform plants.

EASTERN CROWN

98 days. Compact plant with blue-green domed heads and small bead size. Performs well in long day length moderate heat and is perfect for East Coast growing conditions.

Cabbage **Fun Facts!**

· Cabbage has been cultivated for thousands of years dating back to the ancient Greeks.

There are many different types in this brassica family, from the wellknown green round headed varieties, to Savoy and Napa types.

 The first round-headed cabbages appeared in 14th-century England.

They became more and more popular as cuisine throughout Europe. The first cabbage in America was brought by a French explorer Jacques Cartier on his third voyage 1541-1542.

 Cabbages are prepared many different ways for eating.

They can be pickled, fermented (for dishes such as sauerkraut), steamed, stewed, sautéed, braised, or eaten raw. Some types are best for making cabbage rolls and others in stir fries or salads.

 Cabbage is an excellent source of vitamin K. vitamin C and vitamin B6.

It is also a very good source of manganese, dietary fiber, potassium, vitamin B1, folate and copper. Additionally, cabbage is a good source of choline, phosphorus, vitamin B2, magnesium, calcium, selenium, iron, pantothenic acid, protein and niacin.

A CABBAGE FOR ALL

Cabbage is considered to be a cool weather crop. Maturity dates are based from the time transplants are put in the ground until harvest. From seed add about 6 weeks. Keep well fed and watered during the entire growing season.

FAST VANTAGE

60 days. Great tasting, early variety in the Headstart class with improved uniformity in cool or high heat conditions. Medium green, high quality round heads average 2.5 lbs/ 1 kg and have no Yellows tolerance.

CHARMANT

65 days. Early season type. Dark green large upright plant habit with high yields. Dense heads form slowly for extended cutting periods.

GREGORIAN

59 days. Excellent cabbage flavor produced from the solid round heads that average 7 in/18 cm - 3.5 lb/1.5 kg. Nice green wrapper leaves. High yields.

Kimchi

A traditional fermented Korean vegetable side dish.

Courtesy of Epicurious.com

Makes enough for a 1 gal. jar.

Ingredients

- 1 cup plus 1 tablespoon coarse sea salt.
- 1/2 gallon water
- 2 heads Napa cabbage, cut into quarters or 2-inch wedges.
- 1 bulb garlic, cloves separated, peeled.
- 1 (2-inch) piece of ginger root.
- 1/4 cup fish sauce
- 1 Asian Daikon radish, peeled, grated.
- 1 bunch of green onions, cut into 1-inch lengths.
- 1/2 cup Korean chili powder.

Dissolve salt in water. Soak cabbage in the salt water for 3 to 4 hours. Combine garlic, ginger, and fish sauce in food processor until finely minced. In large bowl, combine radish, green onions, mustard greens, garlic mixture, chili powder, 1 tablespoon salt and optional sugar. Toss thoroughly. (Wear rubber gloves to avoid chili burn.) Remove cabbage from water and rinse thoroughly and squeeze out water well.

Take cabbage and stuff radish mixture between leaves, working from outside in. Divide cabbage among 4 (1-quart) jars or 1-gallon jar, pressing down firmly to remove any air bubbles. Let sit for 2 to 3 days in a cool place before serving. Remove kimchi from jar and slice into 1-inch-length pieces. Sprinkle with a little bit of sesame oil and sesame seeds. Refrigerate after opening. Good to eat for up to about 3 weeks, after that it can get too fermented.

What is Savoyed?

sa-voyed \se'vōid/

Throughout our cabbage pages and those of other leafy greens, you will notice some varieties are indicated as being savoyed. But what does this mean? Savoyed simply means that the leaves of the plant are curled and wrinkled.

CHINESE CABBAGE

Late August sowings will produce "greens" until freezing weather arrives. Used in salad and as a fresh vegetable, Chinese Cabbage is sweeter tasting than regular cabbage. oz/28 g yields about 3,000 plants. For additional cultural information and variety details, please visit our website: www.StokeSeeds.com.

BLUES

57 days. Michihli type. Heads average 10 in/25 cm and are barrel-shaped. Average 3.5 - 4.5 lbs/1.8-2 kg. Use for spring or fall harvests.

70 days. Medium sized slow bolting Napa type cabbage for fall production. Well folded, darker bright green, barrel shaped heads have prominent white ribs.

GREEN ROCKET

70 days. Cylindrical Michihli type. Very tall cabbage with bright green heads that weigh about 4.5 lb/2 kg. Crisp leaves. Recommended for fall harvest. Tolerant to hot and cold weather.

Item# 76J Packet (100 seeds) 1.000 seeds

Spiced Carrot Ribbon Salad

By Rachel Ray

Serves 4

Ingredients:

- · 1 tsp. cumin seeds
- · 4 tsp. olive oil
- 1/2 tsp. garam masala
- 2 1/2 tbsp. honey
- 1 tbsp. fresh lemon juice
- · 2 lb. multicoloured carrots, shaved into ribbons with vegetable peeler
- 1/2 cup chopped fresh cilantro

Preparation:

In small saucepan, toast cumin seeds in oil over medium until fragrant, 1 to 2 minutes. Stir in garam masala, then honey and lemon juice; season dressing. In large bowl, toss carrot ribbons, dressing, and cilantro; season.

ROMANCE

60 days. Very uniform, smooth, cylindrical, medium orange roots average 8 in/ 20 cm in length. Outstanding orange interiors with an excellent taste.

Differences in Corn Types: Simplified

Sh2 Super Sweet

Crisp textured Super Sweets or shrunken 2 gene corn are divided into 2 classes: the regular sh2 types and the new three way cross types, which have better cold soil vigor. Super Sweets can be grown with other sh2 hybrids, but must be isolated from all other types of corn of a minimum of 30 rows. Their ultra-sweet flavor lasts up to 10 days in the fridge. The name derives from the shrunken, shriveled appearance of the dried kernel which is low in starch.

SE Sugary Enhanced

Sugary Enhanced corn is high in sugar and has very tender kernels. With proper refrigeration this corn will maintain its sweet taste and fresh creamy texture for up to a week. Chief advantages over sh2's are SE's have better early seed vigor, they do not require isolation, and possess darker, fresher green husks.

SY Synergistic

Synergistic corn cobs combine differing genetics on the same ear. They contain about 45% sh2 kernels and 55% SE kernels which produces an exceptional sweet and creamy corn. These synergistic types are less sensitive to cold weather and do not need isolation from other corn types.

HYBRID SWEET CORN

Corn is a tough plant, and will survive in many types of soil. Weather and fertilizer play a large part in the shape, and length of the cob. To assure a continuous supply of fresh corn throughout the season, sow every week from early May till July 1st.

The Three **Sisters**

By Steven Biggs

Corn is the nitrogen-guzzling glutton of the vegetable garden. It is what is often called a "heavy feeder."

Crop rotation is one way to deal with nutrient guzzlers such as corn. Rotate ravenous corn with crops that replenish the soil. For example, the roots of "legumes" such as beans and peas work with bacteria that capture nitrogen from the air. Some of this captured nitrogen feeds the legume plants, while some is released into the soil.

Companion planting is another way to deal with heavy feeders. In Native North American agricultural tradition, companion planting trio of the "Three Sisters" spoon-feeds nitrogen-hungry corn plants.

The Three Sisters are corn, beans, and squash. Tall corn plants support vining bean plants, making a perfect climbing pole. Beans, in turn, help to anchor tall corn plants during heavy winds. More importantly, they feed the soil with the nitrogen captured from the air. Down below, sprawling squash plants, with their large leaves, shade out would-be weeds and minimize the loss of moisture from the soil.

TEMPTRESS

70 days. QuadSweet[™] brand with high eating quality. Early, sweet bicolor with strong emergence and vigor. This large, 8 in/20 cm long, 16 row corn has good snap and ear height. Sturdy, clean 6.5 ft/2 m plant.

Ideas From Our **Experts**

Grow lots of cucumber in a small space by choosing the cucumber type and growing technique that best suits your garden.

Cucumbers come in vining and bush types. Bush-type cucumbers stay in a relatively small space. They don't send out long vines, making them a good choice for small gardens and containers.

Vining-type cucumbers send out long vines that, if left to their own devices, sprawl around the garden, taking up a fairly big area. While growing them this way is very simple, it takes too much space in a small garden. But it's possible to fit viningtype cucumbers into small gardens by growing them vertically instead of allowing them to sprawl. Grow vining cucumbers up a fence or trellis.

Better yet, get two crops from the same patch of ground by making an A-frame with the cucumber vines growing up the frame, and a shade-tolerant plant such as lettuce underneath. (Greens such as lettuce, spinach, and chard do very well in such a shaded location in the heat of summer.)

Gardeners with compost piles might consider growing cucumbers on the pile. Compost piles often represent unused growing space. Throw a layer of soil a few inches deep on top of the pile, and then sow cucumbers atop it. They can grow on top of the pile, while the material below decomposes into compost.

- Steven Biggs

SLICING AND

Cucumbers like a long, warm growing season of at least 50 days or more. Sow indoors, about 4 to 5 weeks before your last spring frost or sow outdoors in warm soil at least 2 weeks after last spring frost.

PATIO SNACKER

60 days. Regular size 8 in/ 20 cm slicer produces short 3 ft/90 cm vines! Excellent size for short trellised containers. Dark green fruit have good flavor, texture and non bitter skin. Untreated seed only.

Item# UT141F Packet (30 seeds) 250 seeds

7 TALLADEGA

55 days. Gynoecious. High yielding, continuous setting slicing type with very dark green smooth fruit, no ridging, few spines and very little "yellow belly".

Item# 146J \$7.50 Packet (50 seeds) \$4.00 \$26.00 250 seeds \$10.70

SLICE MORE

62 days. F1 hybrid. Parthenocarpic female crossed with a pollen bearing male. Bush burpless slicer type with an excellent dark green colour, very straight 8 in/22 cm fruit and exceptional taste. Excellent yields. A popular home garden variety.

Item# 138S Packet (30 seeds) \$3.25 250 seeds \$7.55

PERSEUS

50 days. Gynoecious. Great tasting cucumber with a much smaller, shorter and thinner shape. Dark green fruit with very smooth no-peel skin is very sweet, tender, bitter free (burpless) and seedless.

Item# 146P Packet (30 seeds) 250 seeds

MARKETMORE 76

58 days. Open pollinated. This slender slicer produces 9 in/ 23 cm long, dark green, uniform fruit with few yellow bellies at harvest. Good yields and excellent flavor.

Untreated, order UT137C.

Cold Cucumber Soup with **Yogurt and Dill**

Credit: foodandwine.com

Yield: Makes 5 cups

Ingredients:

- 2 large European cucumbers (2 1/4 pounds), halved and seeded-1/2 cup finely diced, the rest coarsely chopped
- 1 1/2 cups plain Greek yogurt
- 3 tablespoons fresh lemon juice
- · 1 small shallot, chopped
- 1 garlic clove
- 1/3 cup loosely packed dill
- 1/4 cup loosely packed flat-leaf parslev leaves
- · 2 tablespoons loosely packed tarragon leaves
- 1/4 cup olive oil, plus more for drizzling
- · Fresh ground white pepper
- 1/2 red onion, finely chopped

Blend all ingredients until smooth. Season with salt and white pepper, cover and refrigerate for at least 8 hours or overnight.

Garnish with the finely diced cucumber, red onion and a drizzle of olive oil and serve.

PICKLING

ENGLISH TELEGRAPH

63 days. Open pollinated. Superb flavored cucumbers average 15-18 in/38-46 cm in length, are slim, straight and symmetrical. Fruit are non bitter and dark green in colour.

JUMPSTART YOUR SALADS WITH

Most types of lettuce prefer cooler growing temperatures and do poorly or bolt in the summer heat. Since lettuce is about 95% water, plants require lots of moisture. Suggest you start head lettuce indoors for best results. Leaf or cos lettuce do better in warmer climates; sow indoors or outdoors in cool days. All lettuces are open pollinated.

MILD MESCLUN MIX

20 days. This mix includes red and green Salad Bowls, red and (8-12 in/20-30 cm) Contains green Rapids, red and green Cos, plus Pak Choi, Hon Tsai Tai, kale and brassica greens.

SIMPLY SALAD™ **ALFRESCO MIX**

red and green leaf lettuces with arugula, endive and radicchio which gives a true Mediterranean flavor. Pelleted seed.

Item# P185X \$5.50 Packet (25 pellets) \$12.60 250 pellets

SIMPLY SALAD™ **GLOBAL GOURMET** MIX

(8-12 in/20-30 cm) Red and green leaf lettuces and Asian greens make a nice mix of flavors, great in salads or stir-fry. Pelleted seed.

Item# P185Z \$7.50 Packet (25 pellets) \$48.45 250 pellets

GREEN SALAD BOWL

48 days. Each plant makes a decorative rosette of wavy rounded notched, tender leaves. Best loose-leaf lettuce, as it holds flavor and its fine texture in the heat. Slow to bolt.

Item# 179B \$7.50 Packet (600 seeds) \$4.25 \$10.40 \$48.45 1/2 oz/14 g

Stagger **Planting**

/'stægə/

Plant seed in beds every two weeks throughout the growing season and to harvest pick the mature outside leaves leaving the less mature center room to grow. This way, you will have a continuous supply of lettuce from late spring through late fall. You also will not end up with an overabundance of lettuce that will need to be picked and eaten at the same time.

Harvest continuously as overgrown lettuce leaf will be bitter and tough.

RED SALAD BOWL

51 days. Atractive, deeply lobed oakleaf type with pure red tender leaves. Holds flavor and fine texture in the heat.

NEW RED FIRE

43 days. Standard looseleaf red. Medium dark red fall colour during short day length. Excellent tolerance to bolting, bright red colour under longer day lengths.

GREEN TOWERS M.I.

74 days. Popular Romaine with extra large upright, dark green heads that are less cupped at the top than other Cos types. Crisp, savoyed dark green leaves with smooth ribs. Pelleted seed.

Item# 179C Packet (600 seeds) 1/2 oz/14 g

NUTRITIOUS, DELICIOUS! KALE

The ideal plant to grow, germinates in a wide range of temperatures. Plants are hardy to near freezing temperatures if protected from winds. Harvest in 60 – 90 days so late summer planting for fall harvest an option. Harvest early for milder taste. For additional cultural information and variety details, please visit our website: www.StokeSeeds.com.

BLACK MAGIC

55 days. Open pollinated. Dark black/green heavily savoyed, narrow, well textured 16 in/41 cm leaves with white ribs. Plants have an improved bolting resistance and an excellent tolerance to cold weather.

Item# 168F 1,000 seeds 5,000 seeds

REDBOR

55 days. F1 hybrid. Fine curled, tall 24-26 in/61-66 cm plant that turns from green with pink veins to a striking dark maroon as it matures. Colour enhanced when the season turns cooler.

Item# 168N \$3.73 Packet (100 seeds) \$5.50 Packet (120 seeds) \$17.10 1,000 seeds

VATES BLUE CURLED

56 days. Open pollinated. A finely curled blue green kale. It has a tall upright plant habit with sturdy stems resulting in easy harvesting. 14 in/ 35.5 cm plant.

Item# UT168A \$60.22 1/4 lb/113 g

DARKIBOR

55 days. F1 hybrid. 20 in/ 51 cm. The triple curled, rich blue/green colour leaves of this top-quality Vates type plants are juicy sweet and tender. Easy to grow and is ideal for multiple harvests.

Item# 168L \$4.50 Packet (100 seeds) \$5.50 \$18.00 1,000 seeds \$24.14

OKRA

A challenge to grow in cooler climate. Sow indoors 4 – 5 weeks before transplant. Move outdoors when night time temperatures above 13°C/55°F. Will stop growing in cold weather.

KOHLRABI

Plants prefer mild or cool weather. You can direct sow in spring or fall. Leaves also go well in salads for optimum taste. Harvest bulb when it is about 2 inches wide. Will store in the fridge for several months. We are predicting this to be the next "in" root crop.

LEEK

Start seed 8 - 10 weeks before last spring frost. Plant transplants roots deep or hill for blanching effect. They require a lot of water and good weed control as roots are shallow.

WINNER IMPROVED

CLEMSON SPINELESS

57 days. This hybrid kohlrabi produces smooth, light green bulbs weighing about 18 oz/510g. It's a vigorous, upright plant. Bulbs have a fresh, fruity taste. While the leaves are still young and tender, they can be cooked like kale or collard. High yielding.

54 days. Open pollinated. Dark green, fleshy, tender, ridged spineless 5 in/13 cm pods.

ENJOY REFRESHING MELON

Muskmelon and Cantaloupe: For short season areas, sow indoors from April 15th - May 15th. Seed will not germinate at lower soil temp. Cantaloupes like warm sandy ground, and they will not tolerate a highly acidic soil (too much fertilizer). Clay soils are not recommended. Melons must have full sun or the flesh colour will get pale.

PASSPORT

73 days. (Honeydew x Galia type) Large early fruit average 5-6 lbs/2.6 kg, 6-7 in/15-17 cm in diameter. High sugar flavor, 12-13% Brix.

PRIMO

79 days. Very firm, large 8.25 lb/4 kg oval fruit. Smooth orange fleshed large 4-6 lbs/ and heavy netted with a small seed cavity. High sugar taste (12% Brix).

GODDESS

70 days. Very sweet, medium 2-2.7 kg melons, with fine netting and shallow sutures. Excellent early yields with good disease resistance.

SUGAR CUBE

80 days. Unique disease tolerant melon! This is a small 1.8 lb/1 kg personal cannon ball sized melon with a high sugar taste (14% Brix). Deep orange flesh, tight interior, amazing taste.

RADISH &

Radishes are a quick growing, cool-season crop that provides quality root shape at growing temperatures of 50-60°F/10-18°C, during spring and fall. Pkt. sows about a 40 ft/12 m row. Spacing of seed, proper moisture at the proper time will control the shape of the radish.

When stressed plants will bolt to seed.

Radish Fun Fact!

Radishes are a fast-growing, annual, cool-season crop.
They are grown for their swollen tap-roots which can be globular, tapering or cylindrical. Both root and leafy tops can be eaten and are eaten raw in salads, tops sautéed and roots roasted.

Radishes can be useful as a companion plant for many other crops. This is probably

because their pungent odor deters such insect pests as aphids, cucumber beetles, tomato hornworms, squash bugs and ants.

CHAMPION

20 days. Open pollinated. These vigorous, large topped, radishes are bright red, round and are the size of a silver dollar. The standard large round type, used in spring or fall.

ONIONS

Direct sow onions Apr. 10th to May. As bulbs reach an acceptable size, pull plants or bend tops at the bulb neck. Pile in wind rows, so that bulbs are cured by the sun for at least a week. This seals the bulb for storage. Varieties are to be used only for Northern USA and Canada. **Spanish onions** – suggest sowing indoors for best results.

LASALLE

103 days. Large, dark bronze, round globe shaped, high yielding onion with small neck. Excellent firmness and skin retention after 8 months storage. Resistant to pink root and fusarium.

AILSA CRAIG **EXHIBITION**

110 days. Open pollinated. Huge, mild, round Spanish onion with yellow-skins, and unique sweet flavor. Bulbs average 5 lbs/2.4 kg.

SV4643NT

110 days. Large round bulb has medium to dark red exterior with good internal colour. Medium storage potential.

RIDGELINE

107 days. F1 hybrid. A long day yellow storage onion with excellent yield potential. Globe shaped bulbs have brown skin and are slow to bolt. Has potential to produce jumbo sized bulbs with good roots.

History of the pea

The earliest pea is thought to have dated back to 4800BC to 4400BC in the Nile Delta area. Early peas have also been discovered in Upper Egypt around 3800BC to 3600BC - some of which were discovered in Egyptian tombs. This has led archeologists to suggest the pea originally came from the near east in countries like Turkey, Jordan and Syria with the vegetable's popularity spreading from there.

- The Telegraph

Parsnip, Yam & Watercress Chowder

Courtesy of Epicurious.com

Makes 4 to 6 servings.

Ingredients

- 1/4 cup (1/2 stick) butter
- 4 cups 1/2-inch cubes peeled parsnips
- 1 1/2 cups chopped onion
- 3 cups low-salt chicken broth
- 1 cup chopped peeled Granny Smith apple
- 1 1/2 cups 1/2-inch cubes peeled yam
- 1/8 teaspoon freshly ground nutmeg
- 1/4 cup whipping cream
- 4 cups watercress sprigs (tops of 2 bunches)

Melt butter in heavy large pot over medium heat. Add parsnips and onion. Sauté until onion softens, about 5 minutes. Add 3 cups broth and apple. Cover and simmer until parsnips are tender, about 12 minutes. Puree 2 cups parsnip mixture in blender until very smooth. Return puree to pot. Add yam cubes and nutmeg. Cover and simmer until yam cubes are tender, about 12 minutes. Mix in cream, then watercress. Stir until watercress wilts, about 2 minutes. Thin chowder with more broth, if desired. Season to taste with salt and pepper.

PARSLEY & PARSNIP

Parsnip: Biennial in the North, frost improves taste. Direct sow in early to late spring in warm soil temperatures. 21 days to germinate do not let soil dry out completely. Thin to 3 in/6 cm apart. **Parsley:** Takes 5-6 weeks to emerge from the soil, avoid soil crusting. Recommend chilling the seed overnight in a refrigerator before planting.

Spanish Quinoa Stuffed Peppers

Credit: Minimalistbaker.com

ACTIVE TIME: 10 mins TOTAL TIME: 75 mins

Ingredients:

- · 1 cup quinoa or rice (thoroughly rinsed and drained)
- · 2 scant cups vegetable stock (sub water, but it will be less flavorful)
- · 4 large red, yellow, or orange bell peppers (halved, seeds removed)
- 1/2 cup salsa (plus more for serving)
- 1 Tbsp nutritional yeast (optional)
- · 2 tsp cumin powder
- 1 1/2 tsp chili powder
- 1 1/2 tsp garlic powder
- 1 15-ounce can black beans (drained // if unsalted, add 1/4 tsp sea salt per can)
- 1 cup whole kernel corn (drained)

Directions:

Add quinoa and vegetable stock to a saucepan and bring to a boil over high heat. Once boiling, reduce heat, cover, and simmer until all liquid is absorbed and quinoa is fluffy - about 20 minutes

Preheat oven to 375 degrees F (190 C) and lightly grease a 9x13 baking dish or rimmed baking sheet.

Brush halved peppers with a neutral, high heat oil, such as avocado oil or refined coconut oil.

Add cooked quinoa to a large mixing bowl and add remaining ingredients salsa through corn. Mix to thoroughly combine then taste and adjust seasonings accordingly, adding salt, pepper, or more spices as desired.

Generously stuff halved peppers with quinoa mixture until all peppers are full, then cover the dish with foil.

Bake for 30 minutes covered. Then remove foil, increase heat to 400 degrees F (204 C), and bake for another 15-20 minutes, or until peppers are soft and slightly golden brown. For softer peppers, bake 5-10 minutes more.

Serve with desired toppings (listed above) or as is. Best when fresh, though leftovers keep covered in the refrigerator for 2-3 days. Reheat in a 350-degree F (176 C) oven until warmed through - about 20 minutes.

A WORLD

Hybrid Sweet Pepper: Northern gardeners must sow indoors from Feb. to Mar. 15th. Germinate in Jiffy mix then transplant seedlings into deep plastic trays with direct lighting when true leaves are about 0.4 in/10 mm in diameter. Well developed root systems are important to the success of the young field transplant. Harvest is well worth the effort.

72 days. Early maturing blocky 74 days. Extra large, blocky bell pepper with large to extralarge fruit that matures dark green to bright red.

& WINTER STORAGE TYPES

Sow outdoors June 1st. Allow winter squash to ripen thoroughly in the field, until shell is quite hard. Exposure to frost injures quality. Acorn and Buttercup squash will only last about 4-8 weeks after harvest, Butternuts should keep 2-3 months. Delay harvest until a week before fall frost for better taste. For additional cultural information and variety details, please visit our website: www.StokeSeeds.com

SWEET MAMA

75 days. A cupless-buttercup hybrid. Medium sized 4 ft/ 122 cm vines Green-grey fruit average 2.5 lbs/1 kg each. Stores 5 months.

oz/28 g

BUTTERNUT

82 days. Open pollinated. A very uniform 8 in/20 cm long squash with a thick tan coloured fruit, with delicious deep orange interiors.

Untreated, order UT306A.

Item# 306A \$5.75 Packet (25 seeds) \$50.15 oz/28 g

HONEYNUT

85 days. One of the first small-fruited butternut types. Very uniform 8 in/20 cm fruit are very sweet. Exceptional yields of individual-size butternut squash. Untreated seed only.

Item# UT306M \$3.50 Packet (25 seeds) \$6.80 250 seeds

BUTTERCUP

90 days. The finest Buttercup in our trials. Dark green with great uniformity, deep orange flesh, sweet and extra dry. 3-4 lbs./1-2 kg.

AUTUMN DELIGHT

75 days. Semi bush, high yielding acorn squash. Early type with good size fruit and good disease tolerance.

STRIPETTI

95 days. A F1 hybrid which is a cross between Delicata Sweet Potato and Vegetable Spaghetti. Will store 3 months.

PURPLE TOP WHITE GLOBE

RUDBECKIA & SALVIA

Rudbeckia: A hardy annual. Many varieties will re-seed themselves. Sow indoors in March for summer blooms or outside in June for following spring. Sanvitalia: A dependable dwarf annual which loves full sun or some shade, is heat tolerant and requires well drained sandy soil. Sow indoors Feb. 15th to Apr. 1st or directly outdoors May 15th. Salvia: Needs light to germinate. You can sow outdoors late May. **Statice:** If you sow outdoors it needs very warm soil (June)

RUDBECKIA

DENVER DAISY

(18 in-46 cm) Semi-Dwarf Rudbeckia. Masses of yellow flowers with dark centers cover from late spring until first frost. Strong flower stems ensure stability in adverse weather.

CHEROKEE SUNSET

(16 in/41 cm) Stunning double flowered mix in shades of yellow, orange, bronze and brown. Sturdy stems hold blooms all summer long.

INDIAN SUMMER

(3 ft/90 cm) Tall Rudbeckia. Sturdy wind tolerant plants produce huge 6-9 in/15-23 cm single and semi-double golden vellow blooms.

MILLION SUNS

Masses of attractive golden yellow flowers sit above deep green foliage. An easy to grow variety that does not require pinching.

SNAPDRAGONS

Snapdragons: Sow outdoors in sunny warm location. Tall varieties make great cut flowers. Stocks: Slow to flower so suggest sowing indoors. Outdoor sowing after April 1 may not flower before frost. Sweet Peas: We recommend you start indoors mid-March, prefers cooler growing conditions once germinated, but can also be sown outdoors in early spring.

TWINNY™ MIX

(12 in/30 cm) Exceptional garden performance. Fragrant semi-double azalea flowered dwarf snap is tolerant to hot or wet weather conditions. Colours include violet, yellow, bronze, peach and white.

(36 in/90 cm) Long, strong spikes of beautifully coloured blooms. This summer flowering snap should be staked in windy areas. Beautiful cut flower or

(39-60 in/99-152 cm) Plants produce tall, strong stems and long spikes with vivid color and good flower quality. Best production during periods of high light, long days and warm temperatures. Excellent cut flower

(8 in/20 cm) Strong stems with an abundance of blooms on dwarf plants provide constant colour and fragrance. Works in mixed containers.

12 oz/340 g jar

ROOT BLAST

Micronutrients in Rootblast create a bigger root system, helping flowers bloom earlier; fruits and vegetables ripen sooner. Strong, deep roots mean strong healthy plants that are better able to withstand the elements and need less watering.

RB212 \$5.59 ea.

20x60 in/50x152 cm (WxL)

COCO LINER ROLL

If you have unique planters or various basket sizes "cut to suit" with this high density coco liner with a latex coating. It will provide you with the same ease of use as a traditional fitted liner.

Z1711 \$6.99 ea.

HORTICULTURAL PERLITE

Perlite is mined and then heated until it 'pops' into a round, white material that's used in seed-starting and potting mixtures. It lightens the soil, allows for more air around the roots of plants, and to help retain water and improve drainage.

Z1903 \$12.95 ea.

ose Pottini

ORGANIC POTTING MIX

Greenhouse quality mix, 100% organic. Contains sphagnum peat moss, coir pith, perlite, and lime for PH balance. Fertilizer must be added.

G806 \$13.95 ea.

- **76** - Order Toll-Free: 1-800-396-9238

HOT HATS

Protect your plants from snow, frost, hail, wind, drought, birds, insects, chemical spray and excess moisture. Increase your harvest up to 30% on most crops. Plant earlier and harvest earlier too! Cover plant with Hot-Hat and put some soil on rim to hold in place. Can be used year after year!

9.5 x 12.5 in/24 x 26 cm (H x W)

KOZY COATS®

Frost protection for an earlier growing season. Give your vegetables and garden blooms a jump start by guarding them against the outdoor elements as early as March.

18 in/45 cm (H)

GARDEN COLD FRAME

Light-weight greenhouse takes up little space, but gives plants a great early start! Waterproof transparent cover creates optimal growing conditions and the roll-up zipped panel enables ventilation, humidity control and easy access to plants. Very sturdy.

Produced from color coated New England Birch wood, these biodegradable labels offer a smooth writing surface and great durability. Five separate colors included.

12 in/30.5 cm (L)

D1818 50 pack \$9.99 ea.

PLANTPAL™

The capillary wick acts as a valve, releasing water from the reservoir globe to the soil until the soil and wick are wet. The flow then stops. The process is repeated until all the water has been released from the globe. Green globe 3.5 in/9 cm dia., water capacity 13 oz, 9 in/23 cm (L)

\$6.99 ea.

A1907

GARDEN BANDIT

Sever roots and weeds underground without disturbing good plants. The comfortable power grip handle and sharp curved stainless steel blade are key to the Bandit's precision.

EB305 \$12.95 ea.

PLANT HALOS

A new and unique 'all in one' watering and vertical crop support solution for tomatoes, peppers and beans. Plant Halos can be used on pots (10 in/25 cm dia. plus), raised beds, as well on traditional vegetable plots.

B1817 3 pack **\$28.95 ea.**

CULTI-MATE WEEDER

The ultimate multi-functional gardening tool! Use it for planting, create furrows and then complete small transplants. Great to break up hard soil piles, excellent as an edging device or use as a weeder for paths, pavements and rock gardens.

B1703 \$11.99 ea.

TOMATO CLIPS

The large, easy to use, "figure 8" style plant clips attach plant stems and branches to plant supports, garden wires and trellises. Color: Green.

L1920

\$3.95 ea.

HANDY CAMEL BAG CLIP

The Handy Camel creates a tight seal on open bags using a side hinge opening and ratchet locking system that grip bags without tearing.

H1508

\$4.99 ea.

Five 20 in/51 cm wide x 10.5 in/ 27 cm long curved tines, spaced four inches apart.

JOHNNY'S 520 BROADFORK

This deep-tillage tool deeply aerates your soil. Smart in design, it makes tilling your garden feel effortless as you use your full body weight to maneuver the tool rather than your back and arms.

J1443

\$199.79 ea.

EZ LEAF HAULER™

Better than a wheelbarrow - this hauler holds 4x more leaves, dirt or other yard debris! Tend to yard cleanups with this cleaner, quieter option and get back to enjoying the outdoors by simplifying your yard chores. 6 ft/1.8 m (W)

M1710

\$23.99 ea.

MOLE CHASER

A sonic pulse of 300 Hz covers up to 11,250 sq ft /1045 sq. m. The 4x D batteries (not included) can be changed without removing the unit.

Z9060

\$15.99 ea.

YARD GUARD ULTRASONIC REPELLER

Choose between continuous or motion-sensor. Target specific pests by adjusting the powerful sonic/ultrasonic sound frequencies. Built-in motion sensor is activated within the 4000 sq ft/37 1.5 sq m coverage zone.

Use AC adaptor (included) or 4x C batteries (not included).

B9003

\$54.95 ea.

BIRD CHASER

Uses a built-in motion sensor to trigger two types of audio repellents. The first is a recording of predatory bird sounds (hawks, falcons and owls) that is loud enough to frighten away invaders. The other setting is an ultrasonic sound that is irritating to birds and inaudible to humans.

Z1604

\$19.99 ea.

Easy to install. 3xD Batteries (not included)

TRANSONIC PRO **DUAL SPEAKER PEST** REPELLER

Ultrasonic and sonic sound waves repel small rodents as well as flying and crawling insects. Unit disrupts the pests' nervous systems, affecting their feeding and communication habits. Works up to 3,500 sq ft/325 sqm.

B9002

\$54.95 ea.

9 different settings, quiet for indoor and audible for outdoor pests. Harmless to humans and household pets. Do not use in the presence of rodent pets. Plugs in, no batteries.

FLOODLIGHT CANOPY

A cost effective way to beautifully landscape your yard and reduce the harsh glare from floodlights. Protect and prolong your landscape lighting with this one piece easy to install canopy.

Z1513 3 pack \$18.99 ea.

EZ READ THERMOMETER

This thermometer is great for both indoor and outdoor applications. The temperature tube contains blue colored alcohol to contrast against the red background for EZ reading.

H1602 \$2.99

CORD CONNECT™

Practical and effective way to lock cords together in a dry connection. The simple clam-shell design allows to close around each end of the cord and then a twist locks the cords together for a watertight connection. Tapered ends ensure smooth pulling. Safe and virtually indestructible.

F1040

\$4.99 ea.

SOLAR BATTERIES

Four 600mAh Nickel-Cadmium rechargeable batteries (AA). Compatible with most solar powered garden accessories.

A1100 \$4.99 ea.

FLEIXBLE GRILLING SKEWERS

This food-grade stainless steel cable-style skewer holds twice as much food as traditional skewers. Simply marinate foods right on the wire inside of a bag and place directly on the grill. The wire skewer remains cool to the touch. Dishwasher safe.
