## THE MAINE BOATBUILDERS SHOW

**JULY 23, 24, 25, 2021**  
10am - 6pm Friday & Saturday,  
10am - 4pm Sunday

The Maine Boatbuilders Show and the Maine Small Craft Celebration - an event that traditionally features small boats powered by sail, oar and outboard motor - are merging this summer to celebrate the boating community and the diversity of Maine's ocean economy. The two combined shows will have indoor exhibits, 2,500 ft. of docks for in-the-water exhibits, seminars all three days, a marine flea market and all kinds of boats for sale. There will also be educational and job opportunities to explore. Come see Maine's finest builders and their craft - the show is back on Portland's waterfront, at Portland Yacht Services on Commercial Street. FMI: <http://www.portlandcompany.com/boatshow/>.

### WOOD DOCK HARDWARE

MADE WITH 1/4" HIGH STRENGTH STEEL THEN HOT DIPPED GALVANIZED

**Outside Corner End (H-OCE)** is used at the ends of fingers, ends of dock or for swim platforms.

**H-OCE Ship#7 \$12.98**

**Outside Corner Male (H-OCM)** has one 1/2" tab and a hole for a 3/4" bolt or B-PIN. Would be used with an Outside Corner Female (H-OCF) or with a Single "T" Female (H-SF). **H-OCM Ship#8 \$18.71**

**Inside Corner (H-IC)** has slots and can be used with 1-1/2" - 3" thick wood. The inside corner sandwiches the wood between the opposite outside corner, keeping bolts from burying themselves in the wood. A corner gusset gives the unit a lot of strength and helps from racking the dock. **H-IC Ship#7 \$13.95**

### WOOD DOCK HARDWARE

MADE WITH 1/4" HIGH STRENGTH STEEL THEN HOT DIPPED GALVANIZED

**Washer Plates (H-W)** are used mostly with Angles (H-A) and Cleat Angles (H-CA). The square hole in the plate keeps the carriage bolts from turning when the bolts are tightened. **H-W Ship#1 \$1.24**

**Angles (H-A)** used to hold all cross stringers to side stringers using a Washer Plate (H-W). The wood is sandwiched between the steel and creates a solid corner. **H-A Ship#2 \$3.45**

**Backup Plates (H-B)** are used with Single "T" Males (H-SM) and Single "T" Females (H-SF) for additional strength and to keep bolts from pulling through the wood. **H-B Ship#2 \$3.30**

WOOD DOCK HARDWARE

**Cleat Angles (H-CA)** have slots for various sizes of cleats. The cleat angle is bolted to the side stringer using a Washer Plate (H-W). The cleat is then bolted through the deck into the cleat angle. This keeps the cleat from pulling out of the deck. **H-CA Ship#2 \$4.88**

HARDWARE THICKNESS  
**1/4"**

**Inside Corners/3" I.D. Pipe Holder (H-IC3)** has a 3" I.D. pipe holder welded in place. It can be used to replace a regular inside corner. It will accommodate a 2" I.D. pipe. **H-IC3 Ship#13 \$26.31**

**3" Pipe Holder (P-3)** can bolt to the side stringer and uses 2" standard pipe to anchor docks in place. **P-3 Ship# 6 \$16.41**

**3" Pipe Holder (H-OCEP3)** outside corner end with a pipe holder welded to the end. 3" opening for 2" pipe. Save money by getting 2 pieces of hardware in one. **H-OCEP3 Ship#11 \$23.19**

Our convertible Hoop Pile Holders have 3 basic pieces, a deck plate, a hoop and a roller assembly. This allows you to have a hoop pile holder the way you want it, whether it be a permanent hoop, a removable hoop or a hoop with a roller. You can use the roller assembly on the deck plate or bolt it directly to the dock. All parts are hot dipped galvanized. Add a UHMW Roller to any assembly as shown at the bottom of page 19. All assemblies include a deck plate, hoop, roller assembly, and 6 carriage bolts. Fasteners required to bolt to your dock sold separately on page 28.

□ - DIAMETER

STRONGER DESIGN!

Our mounting plates are 5" x 2" x 3/8" which are welded to the hoop and are used to mount the hoop to the deck plate. Our mounting plates are 33% thicker and 25% wider than most other hoop mounting plates on the market.

An easy way to determine the diameter of your existing pipe or piling is to measure the circumference and divide by 3.14. We've done the math for you with our Circumference chart to the left.
